

Windows 8 App Development

with Web Technologies

Daniel Meixner
Developer Evangelist
Microsoft

Agenda

- Have you heard of ... Windows 8?
- App Platform
- App Development for Web Developers

Windows reimagined

New fast and fluid Start screen

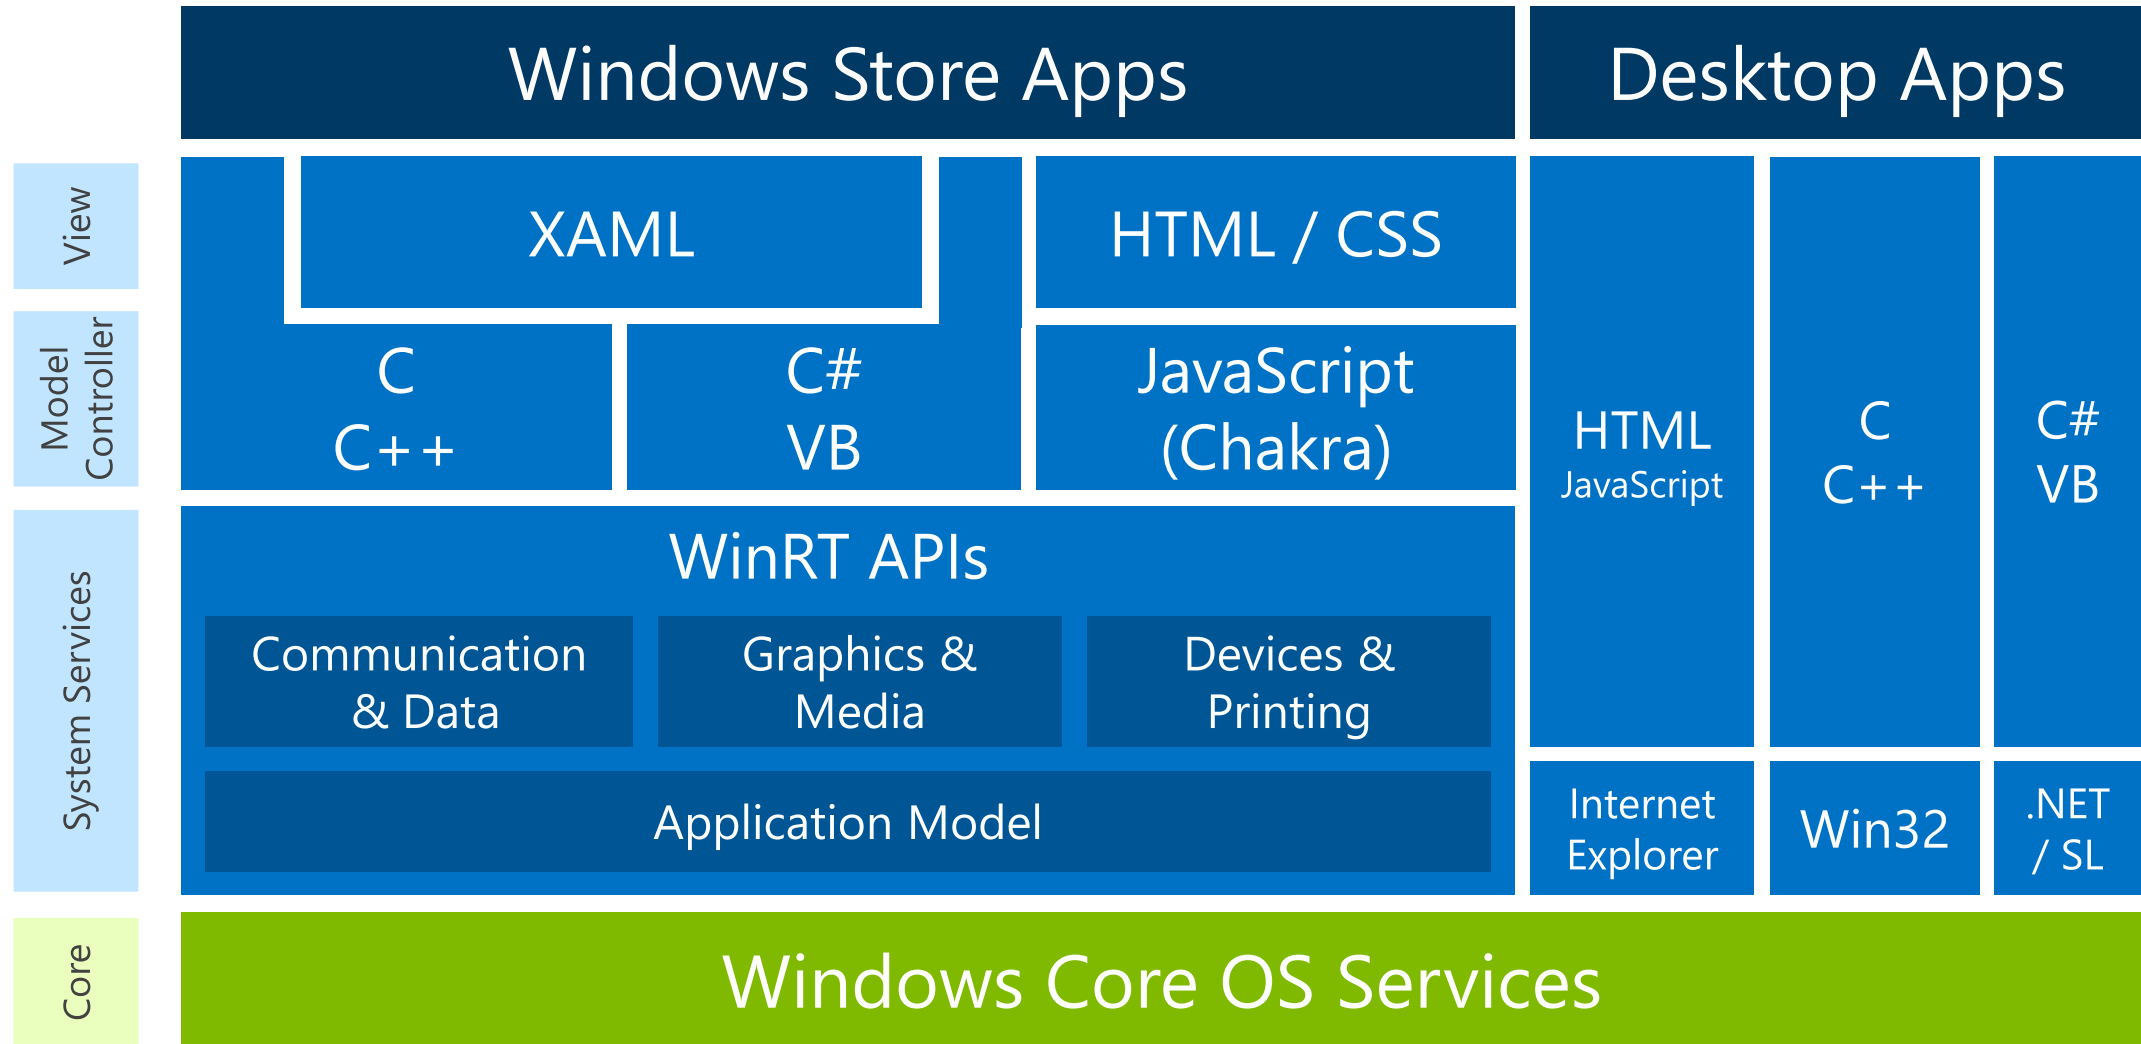

Touch, mouse, keyboard

Everything great about Windows 7 we made even better

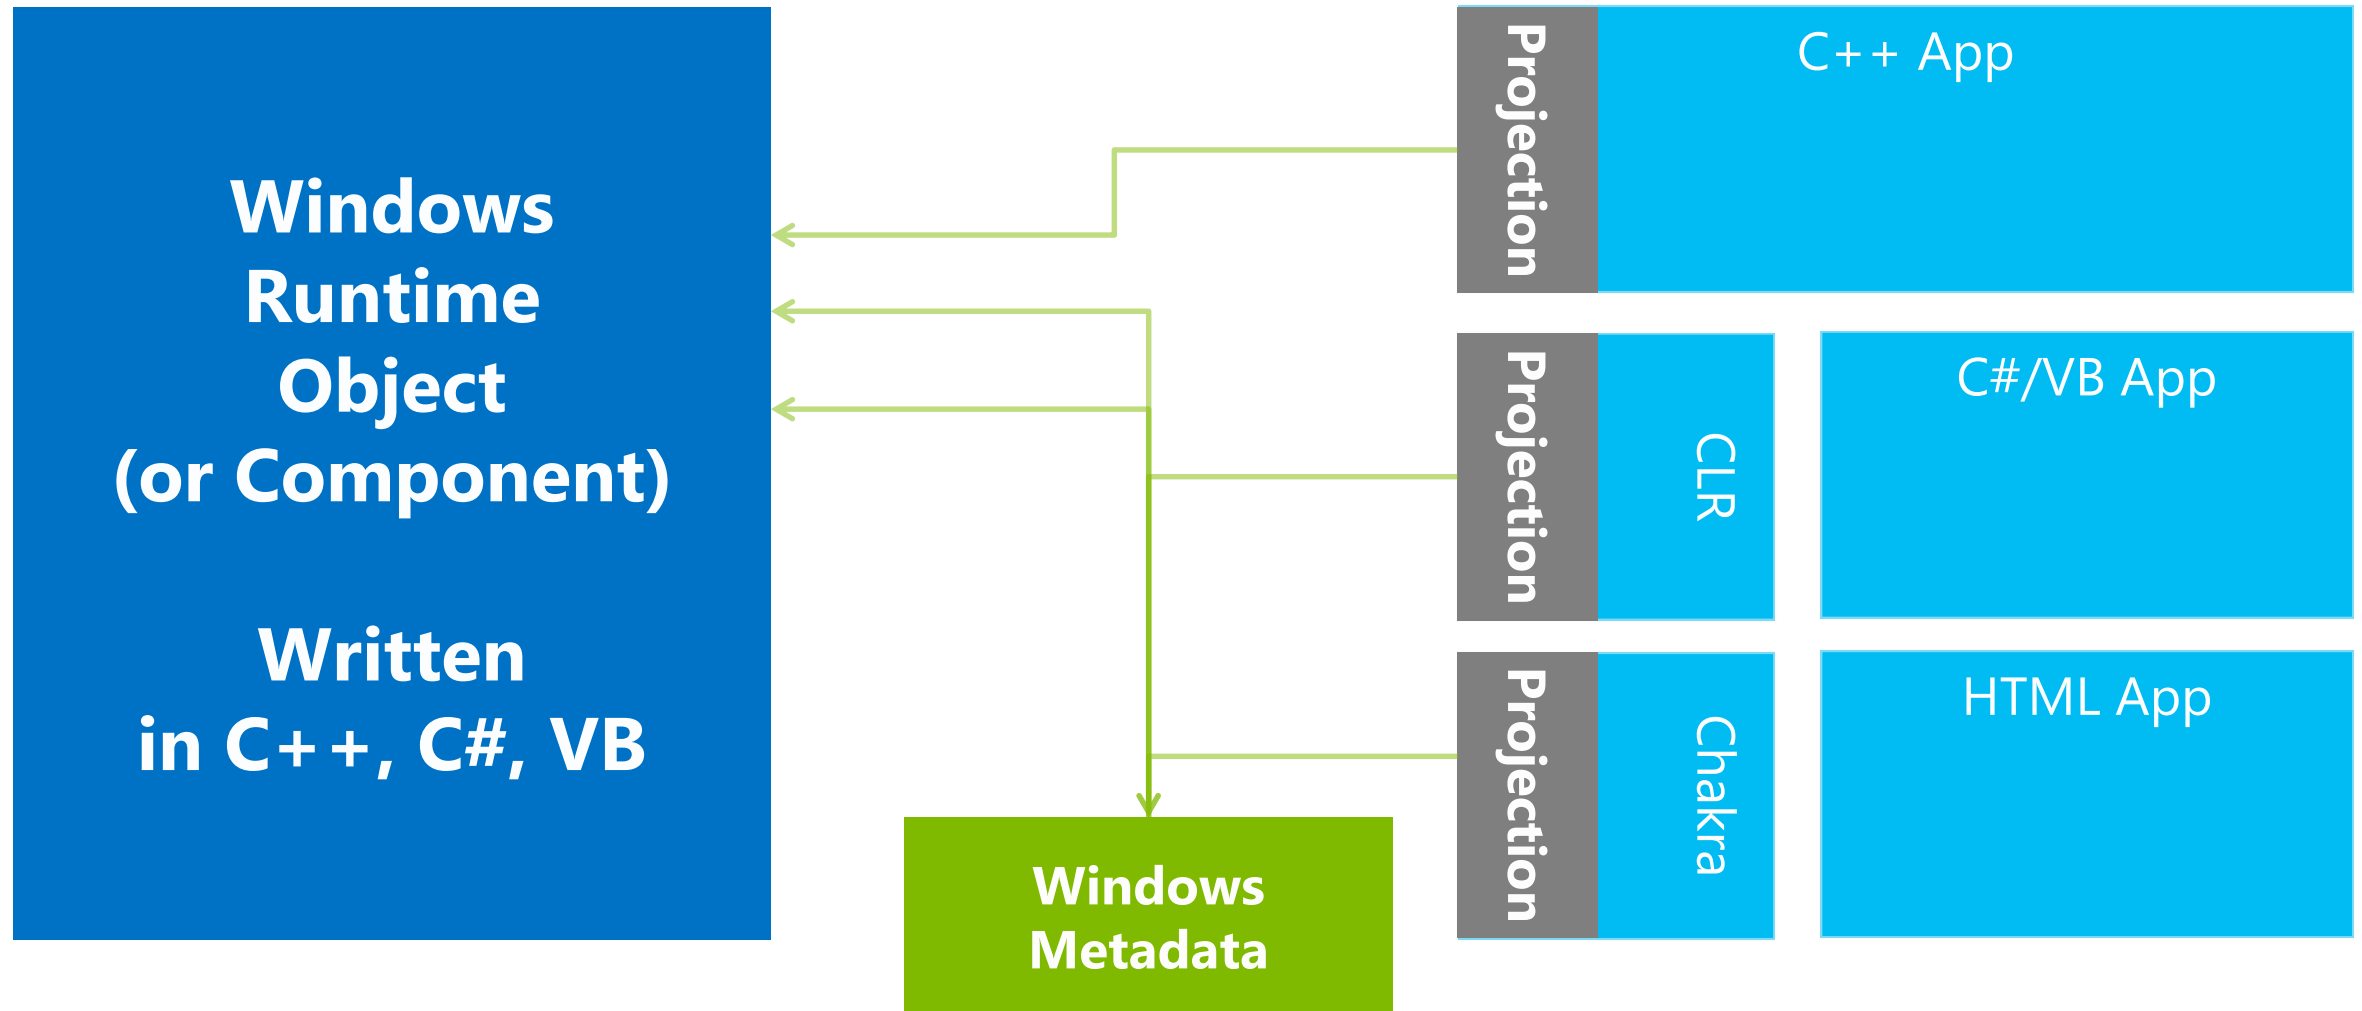

App Platform

Windows 8 Platform

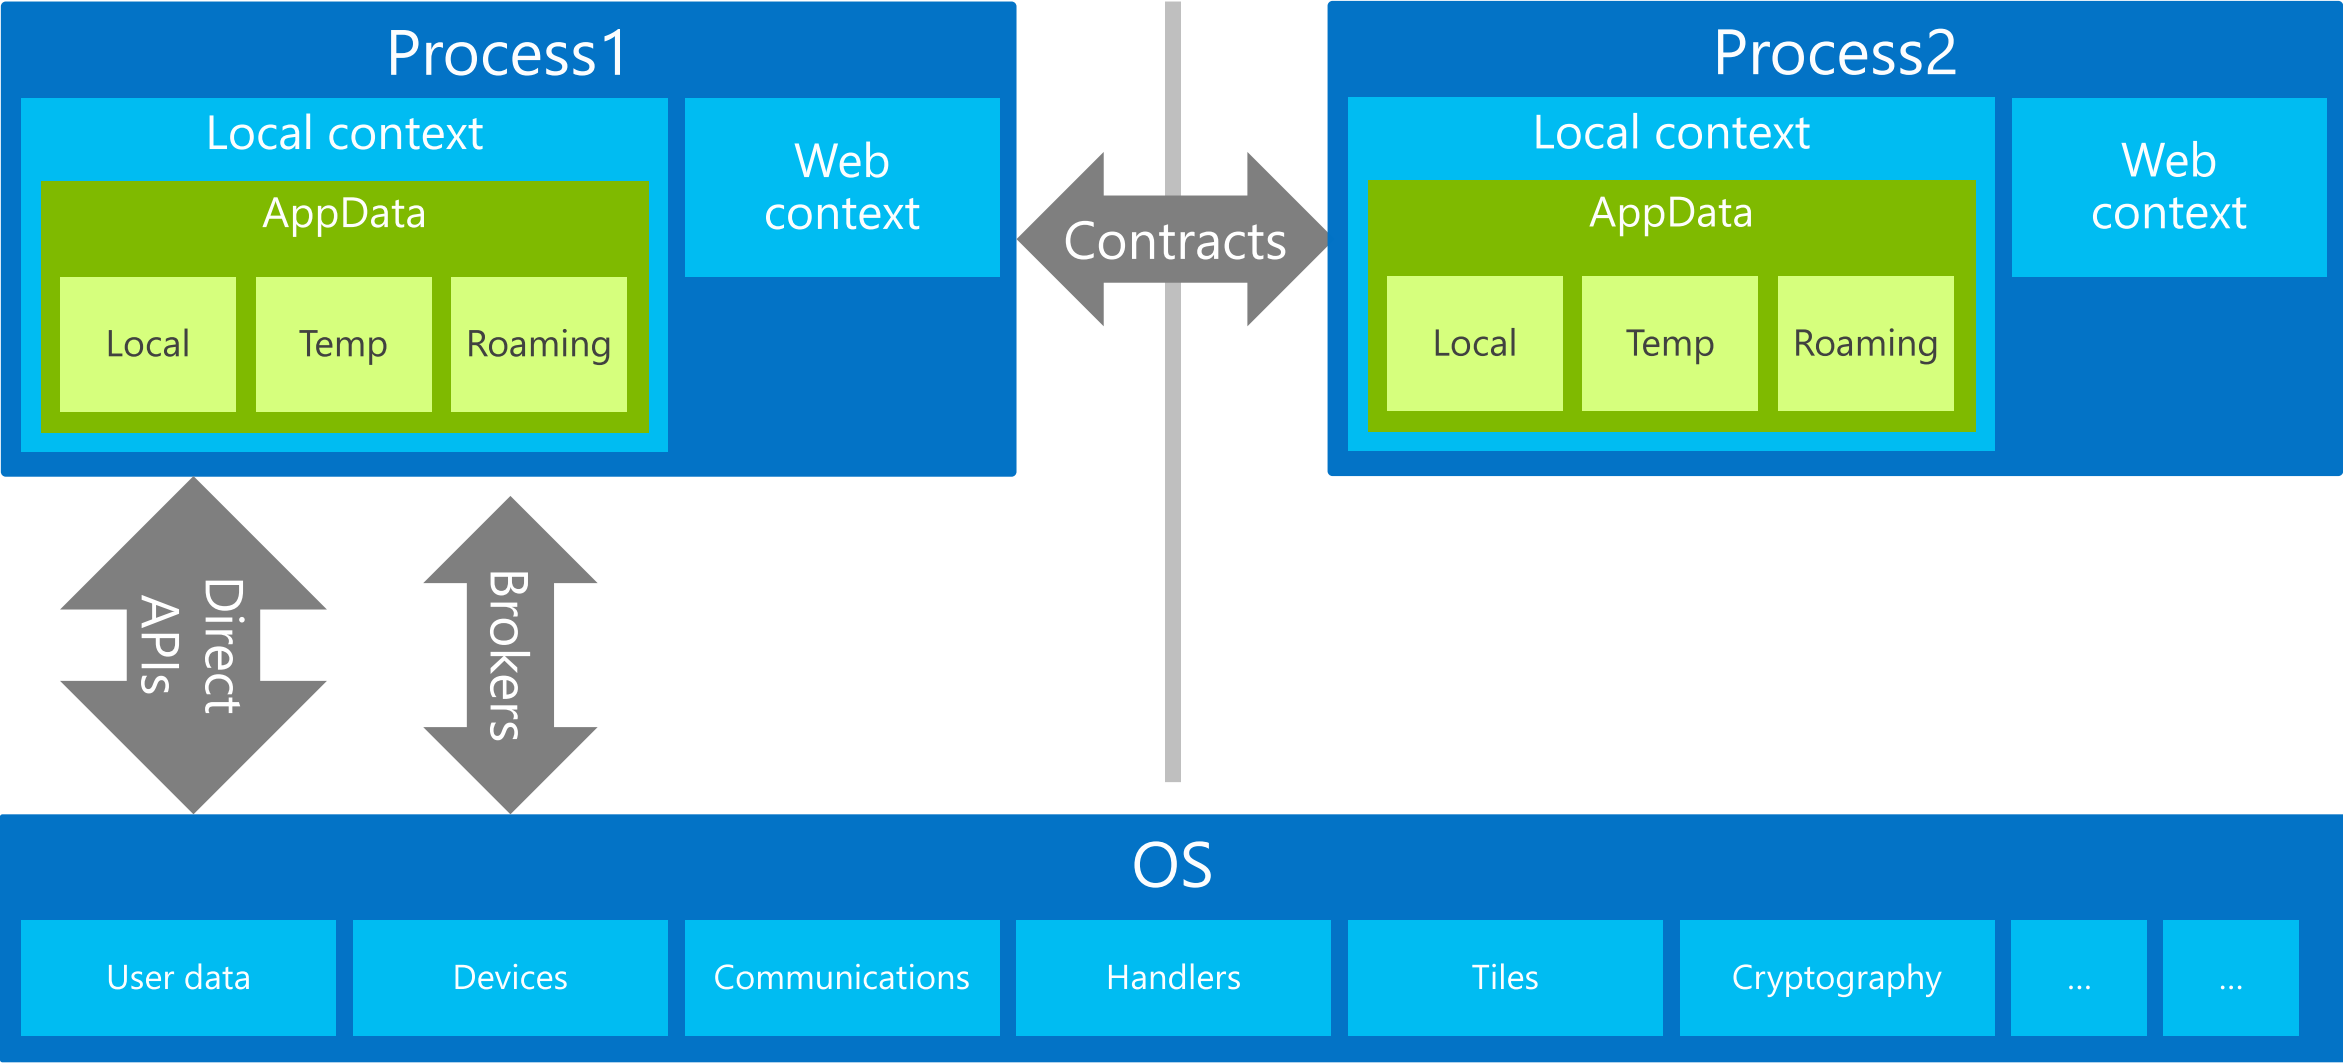

Language projection

If you know web technologies, you are ready to build amazing Windows Store apps.

App Execution Environment

Process Isolation

What did we see?

- Apps build on standard Web Technologies
- Easy to use, easy to discover API -> WinRT
- Easy to use WinJS lib
- Great Tooling

Prefer your own library? Go ahead!

- Adhere to the Modern style UI and Windows personality
- Understand our web context & sandboxing model
- Mix & match works fine

If you know web technologies, you are ready to build amazing Windows Store apps.

(Ok, we already learned this.)
